DETAILED ACTION

Drawings

1. The drawings are objected to because of the following
 - a. Applicant has text which has been crossed out and written overtop of which should be corrected with a fresh drawing that does not show the changes. (Please send a copy in red showing changes and another copy which has the changes in it not showing the corrected changes.
 - b. The inserted element numbers should be written in clearly with uniform type and sizes.
 - c. All text should have a corresponding element number next to it on the drawing
 - d. Figure 2 has lines drawing in that will not appear when copied. Draw lines so they are not faded.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Art Unit: 3723

1. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The following phrases lack proper antecedent basis:

- i. "its door" in claim 1, line 1. The door should have an article such as "a" which would provide proper antecedent basis; furthermore, "its" is a narrative term which is vague.
- ii. "the interior" in claim 1, line 2. This has not been mentioned before.
- iii. "the locking mechanism" claim 1, lines 2&3. This has not been mentioned before.
- iv. "the top-side" in claim 1, line 6. This has not been mentioned before.
- v. "the underside" in claim 1, line 7. This has not been mentioned before.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Bennett (2894720).

Bennett discloses a device which comprises a tool kit being the assembly and disassembly of the device having a pry bar (10) comprising a tapered tip (14), a pivot or fulcrum (20&50) comprising a resilient elastomeric material (50 which is rubber col.3, lines 24-25), and mechanical fasteners (36).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsuha and Woodhouse disclose an invention.
